

Do you have peripheral neuropathy?

*We need volunteers to set up a
new charity to support people
with neuropathy in the UK*

THE PROBLEM

- There is no UK charity or association supporting people with all causes of neuropathy
- Only a few specific causes have a UK charity, such as genetic (CMT-UK), Guillain-Barré and CIDP (GAIN), and diabetes
- People with many other common causes of neuropathy have no UK support, including painful small fibre, idiopathic, carpal tunnel, chemotherapy, brachial neuritis, and more

HOW YOU CAN CHANGE THIS

- Join a small group of motivated people to set up a new charity
- Relevant professional experience would be very helpful, such as running a business, accountancy, fundraising, website programming or public relations
- Other small charities and doctors have already offered to help
- Most work will be by video or email; give as much or as little time as you wish

Contact info@neuropathy.org.uk

Don't contact us if you just want advice on your neuropathy – we're not set up yet!
